

ART ON THE PARK FAB AT 40!

TRACEY PACITTI: An exhibition of 40 paintings in her 40th year

Tracey is a self taught Artist and despite having a life long interest in self expression through painting, it is only in the last 18 months that she has come to paint seriously and in this her first solo show, she illustrates the direction that her work has taken during that time. A notable development in painting style followed a trial painting, included within this exhibition, executed over a cadmium red under painting. This gives each piece a warm, vibrant and exciting quality, leading the viewer's eye around the painting from one vivid brush stroke to another. Tracey achieved a BSc in Psychology and the Cognitive Psychology element of the degree included a residential course based at Stirling University and so her return here to show her work has rekindled many happy memories. There is something nostalgic about these pieces within which most of us can recognise something familiar and comforting.
